INTERNSHIPS

SONOS Data Analytics • 2016

TRAVELERS INSURANCE

Software • 2015

WORK EXPERIENCE

LUUM Sept. 2020 – Present

Product Manager • Sept. 2020 – Present

- Owned two major product areas, Mobility and Parking: ideation, prioritization, product specifications, project management, delivery, communication, and customer demos of new features
- Created and led regular syncs between product team and sales, marketing, and customer success teams dedicated to soliciting early feedback and communicating product initiatives

WRENCH July 2019 – July 2020

Product Manager • Jan. 2020 – July 2020

- Owned product design for new functionality on wrench.com/fleet. Interfaced with design team, business teams, and engineering team to lead ideation, design, development, and deployment
- Led quarterly planning across design, engineering, and UX teams to produce and communicate quarterly roadmaps for all teams
- Established UX testing strategy and led several multi-user tests

Frontend Engineer • July 2019 – July 2020

- Led development of Angular features (improved booking flow, map visualization, service catalog search, and Pendo user tracking integration) and app store deployments (wrote a build script, documented manual regression testing process) for Wrench apps
- Designed frontend hiring homework
- Interviewed engineers, represented Wrench at hiring events. In charge of Wrench's technical summer internship program, including hiring

AMAZON Sept. 2017 – June 2019

Frontend Engineer, The Drop • Aug. 2018 – June 2019

- Primary and sole frontend engineer on team of backend engineers
- Developed and launched new e-commerce site amazon.com/thedrop for mobile and desktop in over 10 countries
- Developed low latency JavaScript features including interactions with legacy systems and partner teams
- Independently drove development of accessibility features
- Taught frontend development and testing best practices to team with brown bags and 1:1 technical mentoring

Software Engineer, Virtual Dash Buttons • Sept. 2017 – Aug. 2018

- Created frontend features for mobile/ desktop/ Amazon devices
