Work Experience

Adobe

Principal Product Manager — *June 2026 - present*
Senior Product Manager — *Sept 2024 - June 2026*

- Led end-to-end launch of ~50% of Adobe Express AI Assistant, including AI imaging, harm & bias policy, and evaluation strategy; partnered with AI Ethics & Legal.
- Owned AI imaging roadmap and integrations across Firefly Image 4 and 3P models (Flux Kontext Pro, Gemini 2.5 Flash); increased imaging export rate 44% vs. existing product.
- Led eval strategy, product quality, leadership reporting, and launch readiness across 15+ AI teams.
- Defined harm-and-bias categories, reduced false positives, and drove product improvements through weekly data reviews, experimentation, and customer satisfaction analysis.

Jackie Loven Art

Sole proprietor, jackielovenart.com — *Oct 2023 - Sept 2024*

- Built handmade glass art business ($40k revenue in 2024); grew audience (38k Instagram, 650+ email subscribers); published and sold data-driven guide for replicating these results.

HealthEquity (via acquisition of Luum)

Manager, Technical Product Management — *May 2022 - Oct 2023*
Senior Technical Product Manager — *Oct 2021 - May 2022*
Technical Product Manager — *Sept 2020 - Oct 2021*

HealthEquity Technical Product Management Team

- First TPM at HealthEquity; reported to VP Software; hired and led team of 3; owned technical requirements for card-processor API integration (Visa/MasterCard) across 15+ teams.
- Authored consolidated runbook and drove completion of migration steps with cross-org teams and 3P partners (Visa, MasterCard, Fiserv); delivered successful no-data-loss migration of HSA card processing for 2.8MM members and 10k enterprise clients.

Luum Technical Product Management Team

- Defined Lyft API integration for rides in-app; managed beta with Lyft partner engineering.
- Drove mobile delivery (+6% MAU; +126% iOS App Store and +45% Android Google Play ratings).
- Owned 'Commute' product vertical end-to-end (roadmap, specs, enterprise demos); established BRD/spec review process; hired team of 2; presented roadmap at conference of 300+.

Wrench

Product Manager — *Jan 2020 - July 2020*
Software Engineer — *July 2019 - July 2020*

- As PM/SWE, shipped enterprise landing and booking site; led roadmap and UX testing. Developed Angular features (refined car service booking flow, map visualization, catalog search, click tracking integration with 3P software Pendo). Automated app-store deployments.

Amazon

Software Development Engineer — *Sept 2017 - June 2019*

- Sole frontend on backend team: built 'The Drop' (10 countries); designed scalable weekly custom clothing line launch orchestration to handle launch traffic spikes.
- Shipped low-latency UX across mobile, desktop, and Echo with legacy systems; improved accessibility.

Patents

Particular actionable GUI object in modal window (Amazon, US10860181B1) *Granted 2020*

Internships

Sonos *Data Analytics Software Engineer 2016* **Travelers Insurance** *Software Engineer 2015*

Personal Projects

Jackie's Glass Duck Stickers (paid iOS app on Apple App Store: 5/5 rating) *2023*
